

# 8 Miracles for 8 Days

Take part in the next miracle with  
MDA's teams and First Responders

## Being in the Right Place at the Right Time

MDA Deputy Director General of Community Eli Jaffe was in the right place at the right time. During his morning workout a man collapsed, and Eli began CPR. The man's life was saved by the defibrillator in the gym.

The gym was the right place to be for one man who collapsed and went into cardiac arrest. Luckily for this man, there was an Automatic External Defibrillator (AED) in the gym, and someone else working out knew how to use it. That someone was MDA's own Dr. Eli Jaffe. Dr. Jaffe is a Paramedic, and began administering CPR until MDA teams arrived from the local station. The man received CPR, medications and electrical shocks, and ultimately was evacuated to the hospital conscious and alert. Without the AED, this would not have been possible, and "such situations prove the importance of early administration of electrical shocks from the AED" said Dr. Jaffe.

Sponsor training, lifesaving equipment, medical supplies and communications equipment for an MDA First Responder for \$4800, and be part of the next miracle.
